- NHS and Government Security Cleared
- Education Security Cleared
- MOD Security Cleared
- New Builds and Refurbishments (CSCS Approved Contactors)
- BICSI Registered
- ISO9001 Company for Network Installations

What cabling services do we provide?

We provide a large range of services to a varied customer base:

- Cat 5e/6 installations
- Voice installations
- Fibre optics installations
- New builds and refurbishments

All of our engineers are trained to the highest standards on cabling systems such as ADC Krone, Nexans and Helleman Tyton.

Integrated Data Needs Ltd (IDN) have been providing cabling to our customers for the past 10 years. Cabling was the starting foundation of our business, we believe that it is the foundation of all your data and or voice applications, and that getting the right specification first time will significantly reduce down time and cost which often occurs with poor installation.

No one wants to incur down time and spend money on a solution that they have already invested in, so it make sense to procure an appropriate cabling network from the start, which is correctly installed and backed up by maintenance and warranty.

When you engage with IDN, we take a professional and systematic approach to any job whether it is for one network point or a complete re-wire. With every engagement, we will send one of our skilled consultants to your site and discuss your requirements and give best advice.

We try to make our surveys easy for the client and understand that there is a different level of knowledge at every site. Our consultants will explain a number of options where possible, how the install will look and give best advice for future growth. Following the visit you will usually receive your quotation/proposal in 48hrs.

Why choose IDN?

IDN has been providing reliable cabling services to it clients for over 10 years. We have a team of trained cabling engineers with a combined experience of over 60 years industry experience between them.

We aim to provide a one stop shop for all our customers' networking needs, and working within the other business units in IDN we provide a converged approach to overall LAN installations. This reduces the cost but more importantly the risk on the project.

We have built our company's reputation on word of mouth and are known for our honest and customer focused approach. It is because of this approach that we have been Somerset Local Authority's preferred networking and audio visual contractor for the past 9 years.

"As the Group Manager responsible for all corporate infrastructure for Somerset County Council I have worked with IDN for eight years. The company has grown in numbers and in its ability to delivery complex, technical projects over this time. IDN has been our preferred partner for our entire cabling infrastructure, both in corporate offices and education establishments. Allied to this is their ability to deliver complex router and switch infrastructure"

Dr David Huw Watts – Group Manager, Somerset County Council
